# Montefiore's COVID-19 Experience

- Hospitals were **first** to face COVID-19 crisis; the Bronx and Montefiore saw the most infections per capita in the city
- Declared essential business and developed **safe working environment**
- Developed process of **evaluating employee symptoms**
- Instituted process for **employee testing** and physician follow-up
- **Trained staff** on PPE equipment use and worksite safety measures
- **Implemented strategy** for returning employees back to work safely

# Employer Return-to-Work Priorities

**Health & Safety must now be part  
of your business infrastructure**

- Demonstrate to the state that your business is ready to reopen
- Ensure business continuity is not affected by poor employee health
- Health & safety operational strategy must withstand any future virus outbreaks
- All employees and management trained on proper health and safety protocols
- Customers must have comfort in doing business
- Leverage relationship with local healthcare system for public health and safety guidance

# Health & Safety Items to Consider

# How to Move Forward

- Stay abreast of **state and CDC guidelines** regarding your re-opening plan based on industry sector and Phases.
- **Develop and document your detailed reopening** Safety Plan outlining how your business will prevent the spread of COVID-19 and withstand any future recurrences.
- **Monitor compliance** of Safety Plan making modifications as needed.
- Ensure employees are informed of re-opening plan and **comfortable returning to work**.
